How it Works:

Place all of the wooden sticks in the bag provided. Each player takes out 7 sticks, The youngest player goes first. He/she makes a sentence/phrase or question with the words available to him/her. They are given 1 point for each word used in such sentence. If you use only 2 sticks, you must pick up another 2 sticks from the bag so you always have 7 sticks in your hand.

Maybe you can only place down “I work”, which would be 2 points.

The next player can use the “I” and put down “I am studying” (3 points), or add to “*I work”: “I work with him*”, for example. That would give him 4 points since the original “I work: is counted again.

Players keep adding to sentences, or start a new one. Adding to an existing one gives more points so players will always favor that in order to get more points and win the game.

The game plays in the form of a puzzle. “Phrazzle Me” comes from the words “phrase” and “puzzle”.

Players that do not know English can guide themselves by the asterisks, underlines and colors:

Words with an asterisk on the left-hand-side go first; *I.

Underlined words go second; have to.

Words with 4 colors on each face (verbs) go third in the same color;

Words with an asterisk on the right, go fourth; the library*

Words with 2 asterisks on the right go last; tomorrow**

I have to clean the library tomorrow**

Red goes with red:

*We have already eaten today**

Green goes with Green:

I am working at home now**.

Purple goes with purple:

*He dances everyday**.

This way players learn how to conjugate the verb correctly.

They can place full sentences correctly even without knowing what it means. They will ask what it means and learn quickly.

The game ends when there are no more sticks left.
